Education

Bachelor of Science, Computer Science (expected 2028)

Grand Valley State University, Allendale, MI

- 3.7 GPA
- Dean's List 2024 - 2025
- Computing Club Member 2025 - 2026

Experience

Intern, FortMiamiGames

January 2026 - Present

- Conducted research and presented findings to improve team decision making and time management.
- Studied documentation consisting of geolocation functions that convert real coordinates into a unity rendered map.
- Effectively communicated with team through virtual meetings, providing updates and reports.

Overnight Stocking Associate, Walmart

February 2025 - August 2025

- Optimized inventory flow during high-volume shifts to ensure 100% product availability.
- Collaborated with a cross-functional team to meet strict nightly quotas under tight deadlines.
- Demonstrated reliability and commitment to team success by providing support when needed, including working on days off to ensure daily quotas were met.
- Applied a curious, problem-solving mindset to understand inventory systems and workflows, helping identify inefficiencies and improve stocking accuracy.

Skills

Languages: Python, C, HTML/CSS

Tools/OS: Linux, Git/Github, Pygame

Coursework: Discrete Structures 1 & 2, Computer Science 1 & 2, System Level Programming, Speech

Projects

Retro Collection Game | Python, Pygame

- Developed a 2D collection game featuring collision detection and custom sprite animations.
- Engineered enemy AI logic using vector math to calculate sight ranges and trigger reactions.
- Applied strong attention to detail while implementing collision handling, state transitions, and asset alignment to ensure consistent gameplay behavior.
- Designed and developed different levels using data structures to manage object spawning, collision barriers, and asset loading.

Personal Website | HTML, CSS, JavaScript

Link: <https://tayjade-13.github.io/>

In Progress

- Designed and deployed a responsive personal portfolio using HTML5 and CSS3 to showcase academic projects.
- Integrated slight dynamic content using JavaScript to enhance site functionality.
